

Faith Science & Wonder

ROMANS 1:20

²⁰ For since the creation of the world God's invisible qualities—his eternal power and divine nature—have been clearly seen, being understood from what has been made, so that people are without excuse.

Cosmology: the universe had a beginning.

$$\frac{P_1}{T_1} = \frac{P_2}{T_2}$$

PHYSICS

$$E=mc^2$$

$$\vec{F}_{21} = -\vec{F}_{12}$$

“When you look from the perspective of a scientist at the universe, it looks as if it knew we were coming.”

FRANCIS COLLINS
GENETICIST

“There are 15 constants—the gravitational constant, various constants about the strong and weak nuclear force, etc.—that have precise values. If any one of those constants was off by even one part in a million, or in some cases, by one part in a million million ... matter would not have been able to coalesce, there would have been no galaxy, stars, planets or people.”

FRANCIS COLLINS

“The laws of science as we know them at present, contain many fundamental numbers, like the size of the electric charge of the electron and the ratio of the masses of the proton and the electron ... The remarkable fact is that the values of these numbers seem to have been very finely adjusted to make possible the development of life.”

STEPHEN HAWKING

“Now it is true that 40 billion planets in the Milky Way have sufficient liquid water to support biological life as we know it. But what of the other necessary zones? Let's take the photosynthetic zone as an example. Without photosynthesis, only microbes can exist; no plants or animals can survive.”

CRAIG KRUEGER

“For photosynthesis to occur, seven factors must be fine-tuned: light intensity, ambient temperature, carbon dioxide concentration, regularly occurring season variation, mineral availability, liquid water supply and atmospheric humidity (for land based life). These seven factors alone eliminate all known star planet systems for habitability except our sun earth system! And there are six other zones to explore!”

CRAIG KRUEGER

$$E = mc^2$$

“A common sense interpretation of the facts suggests that a superintellect has monkeyed with physics, as well as with chemistry and biology, and that there are no blind forces worth speaking about in nature.”

FRED HOYLE

“While impossible to quantify, a surprising number of prominent British researchers at the pinnacle of their fields, with worldwide reputations in the physical and biological sciences, proclaim their evangelical Christian faith.”

MARK PINSKY

“First, they say the likelihood that intelligent, carbon-based life originated in the universe by chance is infinitesimally minute. And second, they proclaim their belief in what they accept as the first-hand, biblical accounts of Jesus’ life, death and physical resurrection.”

MARK PINSKY

Cosmology: the universe had a beginning.

Cosmology: the universe had a beginning.

Physics: the universe is finely tuned.

PROVERBS 8:27,30-31

²⁷ I [wisdom] was there when he set the heavens in place, when he marked out the horizon on the face of the deep, ... ³⁰ Then I was constantly at his side. I was filled with delight day after day, rejoicing always in his presence, ³¹ rejoicing in his whole world and delighting in mankind.
